PRESS RELEASE | Partnership with EPATHLA

Honored to announce our partnership with the **Ministry of Culture and Sports/General Secretariat of Sports** in Greece, in the Sports Integrity domain.

We will work with the **National Platform for Sport Integrity** and we are thrilled and excited about this collaboration in this demanding area, supporting fair play and providing solutions against Manipulation in Sports Competitions.

At **Mediastalker** we celebrate another huge milestone, by the far-further scale and expanding our AI technology and unique operational model.

.....

The **National Platform for Sport Integrity** (acronym in Greek: EPATHLA = awards) derives from Article 13 of the **Council of Europe Convention** on the Manipulation of Sports Competitions (**Macolin Convention**) and it is the main tool for its implementation in our country. Its purpose is the national coordination of the competent bodies, international cooperation and the creation of a monitoring mechanism in order to ensure the implementation of the provisions set out in the Convention.

Mediastalker™ is an AI/ML-powered virtual cybersecurity agent developed to protect the intellectual property of digital content on the internet, online privacy and to support online betting/casino and Sports Integrity industries.
