

Job Title:

Product Manager

As our Product Manager, you will play a pivotal role in driving the development and success of our company's products. You will be the mastermind behind the new era of our company and you will enjoy it. You will work closely with our engineering, design, and business teams to define and execute on product strategy, prioritize features, and bring innovative products to market.

Responsibilities:

- Develop and execute on product strategy, including defining product vision and roadmap, identifying target customer segments, and setting product goals and metrics
- Conduct market research and analysis to understand customer needs, competitive landscape, and industry trends
- Collaborate with cross-functional teams, including engineering, design, and business, to prioritize features and deliver high-quality products on time
- Drive product development process from ideation to launch, including defining requirements, writing user stories, and overseeing testing and QA
- Monitor and analyze product performance, using data to inform decisions and drive continuous improvement
- Serve as a product evangelist, communicating product benefits and features to customers, stakeholders, and the broader tech community

Qualifications:

- 3+ years of experience in product management in a technology company, with a track record of launching successful products
- Strong analytical and problem-solving skills, with the ability to use data to inform decisions and drive product strategy
- Excellent communication and collaboration skills, with the ability to work effectively with cross-functional teams and influence stakeholders
- Experience with agile development methodologies and product management tools
- Bachelor's degree in a technical related field
